```

Log information for unsuccessful log–in account on my instances

1. Account belongs to: Kylie

From the auth.log, there is a great chance that there is a configuration error on her ssh-agent. Since she was testing this three hours before the class began, I do not think we can resolve this before the class.

Log info

```
ubuntu@ip-10-0-9-123:~$ cat /var/log/auth.log | grep '.*sshd.*Kylie.*'
Jul 29 18:53:19 ip-10-0-9-123 sshd[6893]: pam_unix(sshd:auth): authentication
